# Dust Cover Valance

Inside Mount

With inside or ceiling mount, simply install the ceiling clip and mounting screw through the valance as shown. Assemble corners and returns as shown. The returns may need trimmed to size with heavy duty scissors. Make sure the vane doesn't hit the inside face of the valance when rotating.

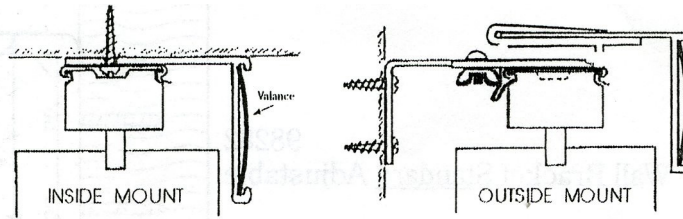

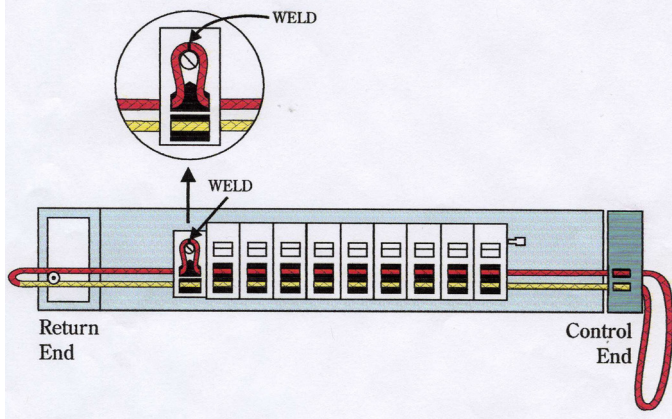

Outside Mount

Mount head rail, snap the valance clips onto the head rail. Insert the dust cover top into the valance clips, assemble corners and returns as shown. the returns may need trimmed to size with heavy duty scissors.

Placement of Valance Clips and Bracket Spacing

Space valance clips evenly along the track.

Outside clips 4"- 6" from end of head rail
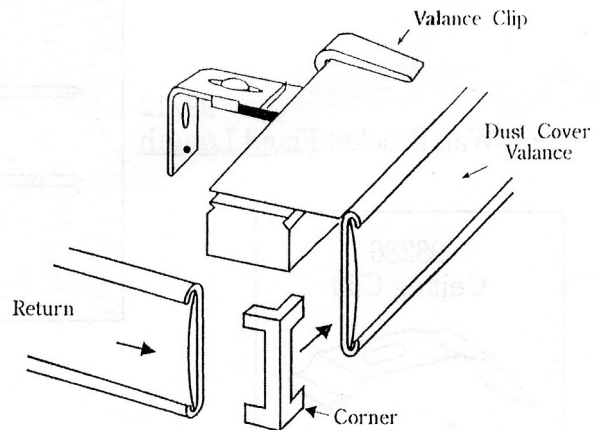

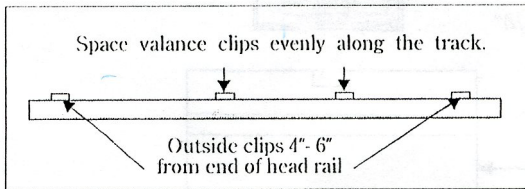

ONE-WAY DRAW UNITS - CORDING DIRECTIONS

Heat two ends together and fasten to lead carrier.

WELD

WELD

Return End

Control End

SPLIT DRAW TRACK - CORDING DIRECTIONS

Heat two ends together and fasten to lead carrier.

Loop upper cord around screw, adjust and tighten.

WELD

Return End

Knot   Knot

Control End

Pull on knot to adjust loop to desired length.

Loosen screw enough for cord to slide through.

Control Chain:
- One full cycle of the control chain (13-1/2") will self align the vanes and stems if out of sync.
