

## Installation Instructions

### Panel Drape with Decorative Wood Pole

Thank you for choosing Lafayette's Panel Drape. With proper installation and care, your new panel drape will provide many years of beauty and performance.

#### Tools Needed

Power Drill, 1/4" Driver and drill bits  
Tape Measure  
Flat blade Screwdriver  
Phillips Screwdriver  
Pencil  
Level

Mounting Surface	Fastener
Wood	#6 Hex Head Provided 
Drywall, Plaster	Wall Anchors Not Provided 
Metal	Sheet Metal Not Provided 

#### BEFORE INSTALLING

- Remove shade from the package. Keep all packaging until the shade operates to your satisfaction. Contents of your hardware package may vary depending on options chosen. Additional fasteners may be needed based on your specific mounting surface.

#### INSTALL THE BRACKETS

When properly installed, the distance between the inside edges of the brackets should be the same as the ordered width. (A.)

- To position the top hole location of the wood pole mounting bracket:
  1. Put a pencil mark at the desired height near the center of opening. (B.)  
**Note \* Lafayette does not take a deduction for floor clearance.**
  2. Put pencil marks near left and right bracket locations, level with center mark. (C.)
  3. Measure to center of window/door opening and mark with pencil. (D.)
  4. Measure left and right from center 1/2 ordered width + 1/2" and mark. (E.)
  5. Measure down from bracket height marks (C.) 1 3/16" to get placement for the top hole of the right and left brackets. (F.)
  6. Secure metal brackets to the wall and slide wood brackets onto metal brackets.

## INSTALL THE PANEL DRAPE

- If no center support is necessary, skip to step 1.  
If a center support is needed, with the small groove in the back of the decorative pole facing up on a flat surface, drill a 3/4" hex head screw into the groove, centered evenly between the ends.
- Slide bracket onto screw and tighten snug. Unscrew 1/2 turn and remove support bracket. Continue to step 1.

1. Lay fabric facedown on a flat, clean surface.
2. Insert fabric carriers into the wood pole. (A.)

3. Slide lock stop into the track between the 1st and 2nd carrier from the end. (Do not tighten) (B.)
4. Carefully slide panel drape to the center of the pole.

## INSTALL THE WOOD POLE WITH PANEL DRAPE

5. Holding pole on both sides of the panel drape to prevent sliding, lift and slide large metal groove of pole onto left or right side locking tab of wood bracket. Opposite side should clear bracket, then slide onto its locking tab also. (C.)

6. Screw finial onto both ends of wood pole.
7. Slide lock stop to stationary rail side and tighten to secure stationary rail against the bracket. (D.)

- If you have a center support, slide center support onto screw on the back of the wood pole.
- Hold in place while securing center support screws into the wall. **Note:** You will need to tighten one screw into the bottom hole and one into the top hole of center support from the bottom of the pole at a slight angle.

## CARE AND CLEANING

- Light dusting is recommended for Manh Truc fabrics. Because the Manh Truc materials are "natural" and include grasses, reeds and bamboos cleaning with water or any detergent is NOT recommended. Dusting with a vacuum attachment can be done with extreme care on low suction. The lining materials for Manh Truc can be spot cleaned using warm water and detergent. Do NOT immerse the lining in water.
